Southwest Calgary, Alberta

Objective

I am a recent graduate at SAIT with a diploma in software development. I am eager to apply my knowledge and skills in a software developer position at your company. I am seeking a challenging full-time position where I can grow professionally and make meaningful contributions to the company's success.

Skills

- Java, JavaScript, React, Python, SQL, PL/SQL

Projects

Appointment Scheduler

A Capstone web application that manages client information and incoming message appointments.

- Coordinated with a small team to develop a Java web application for message scheduling that provides a simple solution to scheduling a message appointment for a local message therapy business
- Used the Agile methodology to provide the best practices for efficient development
- Responsible for developing the appointment scheduling functionality and managing user data using Netbeans IDE
- Contributed in modeling and developing a database schema for storing user and system information using MySQL
- Created dynamic Java Server Pages (JSP) for displaying and formatting data using the JSP Standard Tag Library (JSTL) as well as providing the user with messages to ensure input validation
- Contributed to resolving bugs to ensure its reliability and usability in a timely matter

Education

100 Days of Code: Python Bootcamp

JUL 2023 - Present

- 3-month long course that covers the basics of Python, data science automation, web development and applications

Southern Alberta Institute of Technology

SEPT 2021 - JUN 2023, CALGARY, AB

- IT Software Development Diploma, 3.6/4.0 GPA
- Obtained a strong foundation in object-oriented programming, software security, and database administration
